

Individual Assignment Specifications

- Team: Prunch
- Iteration One

Special Roles

- Project Coordinator: Rex Browning
- Quality Assurance Czar: Priscila Amos
- Video Demo Creators:
 - Austin King
 - Priscila Amos
- Demo-Booth Operator: Logan Fancher

Tasks: Rex

Task 1: Instantiate basic site structure

- Description: Make controllers and routes for all views on the site.
- How to Evaluate: Make sure each page mentioned in the site model diagram at least has an accessible placeholder page.
- Outcome of Task: xxx (Description; filled in at end of iteration)

Task 2: Home Page

- Description: Create a homepage UI to reflect the general theme and design schema of the site.
- How to Evaluate: Confirm that the home page exists and is more than a placeholder.
- Outcome of Task: xxx (Description; filled in at end of iteration)

Task 3: Navbar

- Description: Create a sitewide navbar .
- How to Evaluate: Confirm that the navbar exists (links don't necessarily have to work yet).
- Outcome of Task: xxx (Description; filled in at end of iteration)

Tasks: Priscila

Task 1: Instantiate database model

- Description: Create the database schema from our model diagram.
- How to Evaluate: Confirm that the schema.rb file reflects the design of the model class diagram.
- Outcome of Task: xxx (Description; filled in at end of iteration)

Task 2: Calculator Data

- Description: Manually fill the database with a few calculators.
- How to Evaluate: Confirm that at least a small number of example objects exist in the database.
- Outcome of Task: xxx (Description; filled in at end of iteration)

Tasks: Logan

Task 1: Recommended page

- Description: Create a placeholder recommendation page.
- How to Evaluate: Confirm that the page exists and has forms (they don't need to be connected to anything yet).
- Outcome of Task: xxx (Description; filled in at end of iteration)

Task 2: Calculator Page

- Description: Create a calculator page UI that is consistent with the UI sketches
- How to Evaluate: Make sure the UI accommodates all of the requested features(ratings, picture box, title, etc)
- Outcome of Task: xxx (Description; filled in at end of iteration)

Tasks: Austin

Task 1: Demo Video

- Description: Create a demo video to display the teams progress on the project
- How to Evaluate: Make sure the video demonstrates the teams progress and makes clear who contributed what to the project.
- Outcome of Task: xxx (Description; filled in at end of iteration)

Task 2: Category Page

- Description: Create a category page UI that is consistent with the UI sketches
- How to Evaluate: Make sure that the appropriate subcategories are listed under each category and link to the specific subcategory page
- Outcome of Task: xxx (Description; filled in at end of iteration)

Task 3: Subcategory Page

- Description: Create a subcategory page UI that is consistent with the UI sketches
- How to Evaluate: Make sure that the appropriate calculators are listed under each subcategory and link to the specific calculator page
- Outcome of Task: xxx (Description; filled in at end of iteration)
